

The new generation of 3D printed
cranial remolding orthosis.

Gentle
Flat
Head
Treatment

Why Talee?

Unparalleled comfort

Powered by patent-pending unique design.

Convenient process

Easy to adjust. No grinding or cutting needed!

Save time

The new process cuts appointment times in half.

Stronger revenues

Gain a significant competitive advantage.

Makes your life easier

User-friendly clinical software and a perfect fit.

Like no other

Talee is thin, light, and breathable. While providing significantly improved comfort for the little patient, there are major benefits for both the provider too!

Talee requires less adjustments and saves you up to 50% of clinical time. With our unique software, you have full control over the trimline design before any production even begins. Moreover, there is no grinding or cutting necessary during the treatment.

We will provide you with the user-friendly treatment assessment tool that automatically generates reports for parents. The mobile app is also in the works! Talee effortlessly pleases everyone: the patient, parents and providers.

Offer Talee

Talee is the dream come true. It improves patient comfort and satisfaction while effectively correcting the head shape at a critical time. While offering your patients the most advanced cranial remolding orthosis, you can save yourself time and give your business a significant boost! Ask us about Talee availability.
